SPATIAL INTELLIGENCE

ArgusPTZ

AI Vision Control System

Orchestrate cameras. Respond with context.

Connect wide-area detection, PTZ tracking, floor-map context and alerts in one event workflow.

Detect | **Track** | **Capture** | **Notify**

Bring events into focus

Fixed-camera events direct PTZ cameras to turn, track and zoom for detail.

Locate the event

Floor Map adds location and viewing direction. Edge AI supports local inference.

Build on what works

Extend compatible ONVIF and VISCA-IP cameras with modular software and IoT.

Alerts via email, SMS or WhatsApp, as configured.
Camera compatibility and system scale depend on the selected hardware, software and configuration.

Request a demo. Discuss your project.
