CONNECTED CARE

CareCore ADLs

Daily Living Monitoring Platform

Care begins with understanding.

Understand routines and safety events without images or wearables.

No images | **No wearables** | **Edge AI** | **Daily insight**

One dashboard for everyday care

Daily to yearly activity trends, fall email alerts and RESTful API integration.
Edge AI returns events and status only. No images.

Three sensors for everyday care

SD420
Presence Sensor

Detects room occupancy in bedrooms and living rooms.

SD423
Fall and Posture Sensor

Detects falls and posture changes in living rooms, bedrooms and corridors.

SD421
Stove Dry-Boil Alert

Uses stove temperature and presence data to flag unattended cooking risks.

For daily living monitoring and safety alerts. Alerts require human verification.
Not intended to replace medical diagnosis, emergency response or on-site care.

Request a demo. Discuss your project.
